Education

University of Waterloo — Waterloo, ON
Bachelor of Accounting and Financial Management (BAFM) — *Sep 2024 – Present*

Relevant Experience

Tax Associate — Jan 2026 – Apr 2026
Liberty Tax — *Hamilton, ON*

- Prepared and filed 300+ individual income tax returns using TaxCycle, including basic, self-employed, final, and owner-operator returns, ensuring CRA compliance and accurate application of AFR and RAC access protocols
- Reviewed client financial documentation to identify eligible deductions and credits, minimizing audit risk and maximizing return accuracy across multiple clients
- Reconciled prior-year tax files against current-year filings, carrying forward financial data and maintaining organized records to support quicker file processing
- Completed 1,000+ client outreach calls to collect outstanding documentation, reducing filing delays and maintaining CRA submission deadlines

Additional Experience

Independent Contractor — Feb 2025 – Current
Instacart — *KWC Region, ON*

- Generated $18,000+ in gross revenue as a self-employed contractor by efficiently multitasking between high-volume orders, customer communication, and time-sensitive deliveries in a fast-paced environment
- Maintained organized financial records using Excel to keep in line with self-employed CRA reporting requirements, including expense categorization and income tracking
- Upheld a 4.9/5.0 rating across 1400+ completed orders by delivering high-quality customer service, resolving issues efficiently, and adapting to client-specific needs

Accounting/Mathematics Tutor — Jan 2025 - Jan 2026
Varsity Tutors — *Remote*

- Tutored 10+ secondary/post-secondary students regarding financial and managerial accounting, algebra, polynomials, and functions
- Explained accounting principles (ASPE, G/L's, T-accounts, adjusting entries/closing entries) in practical terms, improving student comprehension of core coursework
- Balanced 10–12 hours of weekly tutoring with full course load, demonstrating time management across overlapping responsibilities

Projects

Annual 10-K Red Flag Scanner | *Python, Flask, Pandas, NumPy, HTML/CSS*

- Built a full-stack financial analysis web application that takes income statement, balance sheet, and cash flow data from 10-K filings and calculates 15+ liquidity, leverage, profitability, and efficiency ratios
- Designed a benchmarking engine that compares a company's ratios against industry-specific benchmark thresholds (Restaurants/QSR, Retail, Software, Manufacturing), automatically flagging deviations
- Developed non-ratio-based risk indicators, including negative shareholders' equity, insufficient interest coverage, and cash flow-to-net income mismatches, to catch risks that ratio thresholds alone would overlook

Technical Skills

Accounting Knowledge: Financial statement analysis/preparation (quarterly, monthly, year-end), IFRS/ASPE standards application (IFRS 15, IFRS 9, IAS 2, IAS 16, IAS 37), Tax Compliance (T4, T2125, T777, TL2, T5008), industry benchmarking, double-entry bookkeeping, adjusting entries (accruals, deferrals, depreciation)
Software/Tools: TaxCycle, QuickBooks Online, Microsoft Excel (VLOOKUP, pivot tables, SUMIF/COUNTIF)
Languages/Analytics: Python, R, SQL (joins, aggregations, subqueries), Jupyter Notebook, NumPy
Certifications: QuickBooks Online Certified ProAdvisor
